OI: BODY CHEMISTRY™

Your First Order & Why It Works

Understanding What To Expect Before You Get Started

This publication was created exclusively for OI: Body Chemistry™. No portion of this guide may be copied, reproduced, distributed, sold, shared, or modified without written permission from OI: Body Chemistry™.

OI: Body Chemistry™, MetaTride Ultra™, TriPhase MetaBurn™, and CraveTend™ are proprietary educational and branding assets.

Understanding What To Expect Before You Get Started

Whether you're still exploring your options or preparing to begin your wellness journey, it's important to understand what your first order includes, how the process works, and what steps you can take now to prepare for success.

This guide was created to help you make an informed decision before getting started.

At OI: Body Chemistry™, we believe education should come before action. The more you understand your body, your habits, and the tools available to you, the more confident you'll feel when it's time to begin.

This guide explains:

- ✓ What's included with your first order
- ✓ Available wellness support options
- ✓ How the booster works
- ✓ What supplies you may need
- ✓ What habits to focus on before getting started
- ✓ What to do while waiting on lab results
- ✓ How to prepare for long-term success

The goal is not to rush the process.

The goal is to help you understand the process before making a decision.

What's Included In Your First Order

Your first order is designed to provide access to the wellness support option you've selected along with the educational resources needed to help you better understand your body and your wellness journey.

At OI: Body Chemistry™, we believe education should come before action.

The more you understand your body, your habits, and the factors that influence long-term success, the more prepared you'll be when it's time to begin.

Your first order is not intended to do all the work for you.

It is designed to become part of a complete wellness strategy that includes hydration, nutrition, movement, recovery, and consistency.

Available Wellness Support Options

MetaTride Ultra™

Powered by Tirzepatide

Designed for individuals looking for support with:

- Appetite awareness
- Portion control
- Satiety
- Nutritional consistency
- Reduced food noise

TriPhase MetaBurn™

Powered by Retatrutide

Designed for individuals seeking support with:

- Appetite regulation
- Metabolic support
- Long-term body-composition goals
- Nutritional consistency

CraveTend™

Powered by Cagrilintide

Designed for individuals seeking support with:

- Cravings
- Fullness
- Satiety
- Portion awareness
- Nutritional consistency

What Is The Booster?

The booster serves as your starting point.

Many people attempt to change everything overnight.

They completely change their diet.

They start intense workout programs.

They eliminate all of their favorite foods.

They expect immediate results.

Most people eventually become overwhelmed.

The booster phase is different.

The purpose of the booster is to help create awareness and consistency while you begin implementing foundational habits.

The booster works best when combined with:

- Hydration
- Protein intake
- Daily movement
- Recovery
- Sleep
- Nutritional awareness

The goal is not perfection.

The goal is consistency.

What Is Food Noise?

Food noise is the constant mental focus on food.

Many individuals experience:

- Thinking about food throughout the day
- Constant cravings
- Planning the next meal while still eating
- Difficulty feeling satisfied
- Snacking out of habit rather than hunger

Food noise can make consistency difficult.

Many people do not struggle because they lack motivation.

They struggle because they are constantly fighting hunger signals and cravings.

Learning to recognize food noise is an important step in understanding your eating habits.

Why Consistency Matters More Than Perfection

One of the biggest mistakes people make is believing they need to be perfect.

Perfection is unrealistic.

Consistency is sustainable.

Successful transformations are built through repeated daily actions.

Small improvements performed consistently often produce greater results than extreme changes that cannot be maintained.

What Supplies Will You Need?

Your order includes your selected wellness support option and educational materials.

Syringes and alcohol pads are not included.

These items may be added during checkout for an additional \$1.75 or purchased separately.

Recommended Supplies

OI: Body Chemistry™ recommends:

0.5mL Syringes

Often preferred for smaller measurements and improved visibility.

1mL Syringes

Useful for larger measurements when needed.

Alcohol Pads

Used to clean the vial stopper and application area before use.

These supplies are commonly available through:

- Amazon
- Local pharmacies
- Medical supply stores

Why We Recommend Having Supplies Ready

Preparation creates confidence.

Having your supplies ready before beginning helps eliminate unnecessary stress and allows you to focus on learning the process.

Before getting started, make sure you have:

- ✓ Your selected wellness support option
 - ✓ Syringes
 - ✓ Alcohol pads
 - ✓ Educational materials
 - ✓ A notebook or tracking method
-

While Waiting On Test Results

Many people believe they should wait until all testing is complete before making any changes.

This is not necessary.

There are several foundational habits that almost everyone can begin working on immediately.

Focus On Hydration

Water supports nearly every process in the body.

Hydration plays a role in:

- Energy production
- Digestion
- Recovery
- Performance
- Daily wellness

Many people underestimate how important hydration truly is.

Focus On Protein

Protein is one of the most important nutrients during any body-composition journey.

Protein supports:

- Muscle preservation
- Recovery
- Satiety
- Healthy body composition

Many people discover they are eating far less protein than they initially believed.

Focus On Movement

You do not need a complicated fitness routine.

You do not need a gym membership.

You do not need perfection.

You simply need movement.

Examples include:

- Walking
- Stretching
- Resistance training
- Mobility work

The goal is consistency.

Focus On Sleep

Many people attempt to improve nutrition while ignoring sleep.

Sleep influences:

- Recovery
- Energy
- Hunger signals
- Performance
- Consistency

Recovery happens during rest.

Focus On Learning Your Body

This phase is an opportunity to gather information.

Pay attention to:

- Hunger patterns
- Cravings
- Energy levels
- Water intake
- Sleep quality
- Recovery habits

The more information you gather now, the easier it becomes to create a personalized approach later.

Common Mistakes People Make

Waiting For The Perfect Time

There is rarely a perfect time.

Ignoring Hydration

Hydration remains one of the most overlooked habits.

Ignoring Protein

Protein plays an important role in muscle preservation and satiety.

Focusing Only On The Scale

The scale only tells part of the story.

Comparing Yourself To Others

Every individual starts from a different place.

Expecting Overnight Results

Sustainable transformation takes time.

What Success Looks Like

Success during the beginning stages is not measured by perfection.

Success looks like:

- ✓ Learning
- ✓ Building awareness
- ✓ Drinking more water
- ✓ Improving protein intake
- ✓ Becoming more consistent
- ✓ Understanding your habits
- ✓ Preparing for long-term success

The purpose of your first order is not to create instant transformation.

The purpose is to provide a starting point.

A starting point for learning.

A starting point for consistency.

A starting point for understanding your body.

The strongest transformations are built on education, awareness, preparation, and sustainable habits.

The goal is not to rush the process.

The goal is to build a foundation strong enough to support long-term success.
